

KRYPTON¹⁰

- 1** **Tweeter à décompression arrière / Soft dome tweeter with "rear chamber"**
 - ▶ Fort champ magnétique, faible distorsion / Strong magnetic field, low distortion
 - ▶ Entouré d'une mousse qui absorbe les réflexions / Surrounded by a foam that absorbs reflections
- 2** **Haut-parleur medium à membrane Kevlar - 5" (13 cm) / Midrange 5 inch in kevlar**
 - ▶ Jaune ou noir selon les versions / Yellow or black depending on the version
 - ▶ Ogive de dispersion pour obtenir une multitude de détails / Kevlar cone ensures incredible precision and detail
- 3** **2x Woofers 8" (21 cm) en pulpe de cellulose traitée / 2xWoofer 8 inch in paper**
 - ▶ Grave rapide et ferme à la fois / Fast and punchy bass
- 4** **Bornier sur plaque en aluminium acceptant tout type de connectiques**
Terminal block on aluminum plate accepting all types of connectors
- 5** **Nouveau logo / New logo**
- 6** **Caisson rigide, renforcé par cloisons internes / MDF structure**
- 7** **Event laminaire en façade / Front laminar port**
- 8** **Support en bois, qui assure une inclinaison de l'enceinte / Stand that tilts the speakers**
 - ▶ Les pointes de découplage à l'avant sont fournies et fortement conseillées pour les pièces qui résonnent / with spikes
- 9** **Bords arrondis et cache magnétique dans un tissu chiné / Rounded corners and magnetic grill**

• THE LAB'S OPINION

The Krypton 10 is the largest column model in the Krypton range.

On technology: The Krypton 10 incorporates all the technologies of the series, such as a tweeter with a rear chamber to reduce distortion, a midrange driver with a Kevlar diaphragm for improved clarity, and woofers with cellulose pulp diaphragms that are extensively motorized for fast, powerful bass. Additionally, it has a laminar front port to promote placement. The Krypton 10 descends lower in the bass than its smaller siblings (Krypton 3, 6, or 9) because it is equipped with larger 21 cm diameter woofers. This deep, dynamic bass, combined with the clarity and definition of the DAVIS midrange/treble system, provides the most realistic listening experience.

About the presentation:

The Krypton 10 is available in three trendy finishes and comes with a magnetic cover covered in a mottled fabric. The speaker has a base screwed to the bottom to tilt the top back slightly, ensuring perfect speaker phasing.

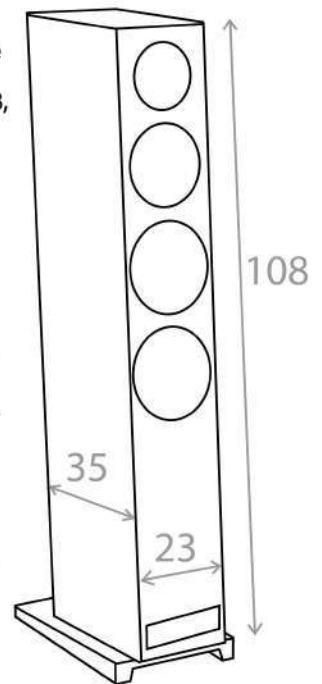

A speaker that's easy to live with...

The front-mounted port makes it easy to position the product while maintaining sufficient spacing between the speakers and between them and the rear and side walls.

The Krypton 10 is a beautiful and slender, easy-to-power loudspeaker. Its good efficiency and neutral character should enable it to be used with all current electronics on the market.

KRYPTON 10 highlights:

- Deep, punchy bass thanks to two 21 cm diameter drivers,
- 200W power handling for a unique immersive sound experience,
- Fabric dome tweeter and treated braided Kevlar fiber midrange (thermoformed in France, a DAVIS exclusive),
- Two cellulose pulp bass drivers for precise, dynamic bass response,
- Wide frequency range (32 Hz to 24,000 Hz) for impressively lifelike sound reproduction,
- Elegant design available in three finishes to blend harmoniously into your interior, and/or to accompany the other elements of the range (in a Home Cinema configuration).

• CHARACTERISTICS KRYPTON 10

Bass reflex	évent laminaire en façade / yes, port in the front
Puissance nominale / Nominal Power	175 W
Puissance maximale / Max Power	250 W
Nombre de voies / Number of ways	3
Nombre de haut-parleurs / Number of drivers	4
Rendement / Sensitivity	93,5 dB
Bande passante / Frequency response	32 -24000 Hz
Tweeter	28mm tissu
Médium / Midrange	Kevlar 13 cm
Woofer	2x 21 cm pulpe de cellulose
Poids (kg) / Weight	28 (un carton)
Impédance / Impedance	4...8 ohms
Fréquence de coupure / Frequency cut off	400/4000Hz
